ABOUT ME

Computer Science student at BINUS University who builds mobile apps and backend services, from the screens people use to the APIs behind them. Aiming for a career as a software engineer, with a focus on clear structure, working code and software that is checked before it ships.

EDUCATION

Binus University Semester 5

Computer Science, Alam Sutera Campus Cumulative GPA: 3.70/4.00

Relevant Courses: Algorithm & Programming, Software Engineering, Software Archictecture, Mobile Hybrid Solution

PROJECTS

StudentOS - Daily Life Companion Mobile App

- A daily-life companion app for students that keeps class schedules, tasks and monthly expenses in one place.
- Recurring schedules where a single class can be skipped, tasks with priorities and due dates, expense tracking in Rupiah with a monthly budget, and JWT login.

Tech: Flutter, NestJS, TypeORM, SQLite

WSpeedRun - Microservices Game Backend

- A backend for speedrunning leaderboards, split into separate auth, game and run services. Built for a Software Architecture lab.
- Three independent services that share one MySQL database through Prisma, with JWT authentication and Swagger API documentation.

Tech: Node.js, Prisma, MySQL, Swagger

Honkai Star Retail - E-Commerce Mobile App

- A game-themed shop app where users browse and buy items and admins manage the catalog. Built for a Mobile Hybrid lab course.
- Separate user and admin roles, search and category filters, live stock checks, image upload and Google sign-in.

Tech: Flutter, Express.js, MySQL

C things through (CTT) - Seminar and Bootcamp Finder

- Mobile app that helps students find and join computer science seminars, webinars, bootcamps and tutoring sessions, with booking, notifications and event requests that an admin approves.
- Built the admin side: a dashboard to review, approve or reject event requests, edit or delete events, and view bookings and users.
- Connected the Flutter app to the Node.js and Express REST API.

Tech: Flutter, Node.js, Express, Supabase

TECHNICAL SKILL

- **Languages: Python, C, Dart, TypeScript, JavaScript**
- **Frameworks and libraries: Flutter, NestJS, Express, Node.js, Prisma**
- **Databases and tools: MySQL, SQLite, Git, GitHub, Swagger**
